- Questions

Overall Status

- Almost all the required functionalities on the UI are implemented.

- Small optional features still missing.

- Back-end functionalities almost done.

Past Week Work

- Back-end :
  - Several validation in the *GetPunches* script are implemented (Same stations punches received within 40 minutes detected).

- Front-end :
  - Timestamp management tool.
  - Organization in the display of the results (Place, elapsed time, delay time compared to the first runner, ...).
  - Race planning tool (Add categories and runners to a race, link runners and SI-units for a race, ...).
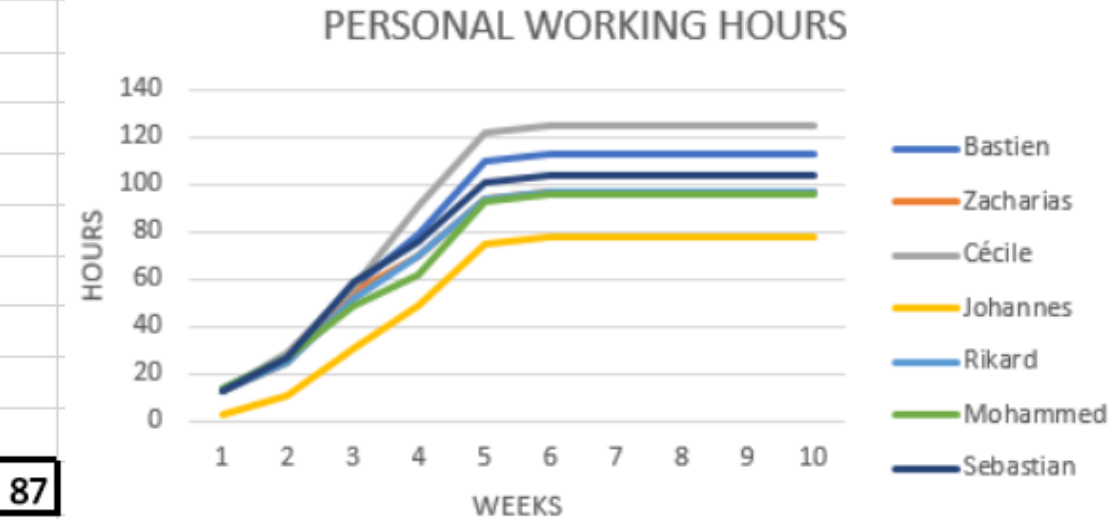

Past Week Work

- Testing :
  - UI test questions prepared.
  - First user test performed and documented.

- Documentation :
  - Design document corrected.

UI Demonstration

Past Week Work Hours

WEEK	50			
Member	Planned	Actual		
Bastien	15	31		
Zacharias	15	24		
Cécile	15	31		
Johannes	15	26		
Rikard	15	24		
Mohammed	15	31		
Sebastian	15	25		
Total	105	192	✅	87

PERSONAL WORKING HOURS

Planned Work

- Back-end :
  - Rest of the validation in the *GetPunches* script.

- Front-end :
  - Mobile view.
  - Main page display.
  - Calculate the current position of a runner on the lap.
  - Excel import system (To put the results directly on the website).

Planned Working Hours

Member	W16	W17	W18	W19	W50	W51	W52	W1	W2	W3	Total
Bastien	12	16	20	18	15	15	5	8	10	8	127
Zacharias	12	16	20	18	15	15	5	8	10	8	127
Sebastian	12	16	20	18	15	15	5	8	10	8	127
Cécile	12	16	20	18	15	15	5	8	10	8	127
Mohammed	12	16	20	18	15	15	5	8	10	8	127
